Low and high hanging features.

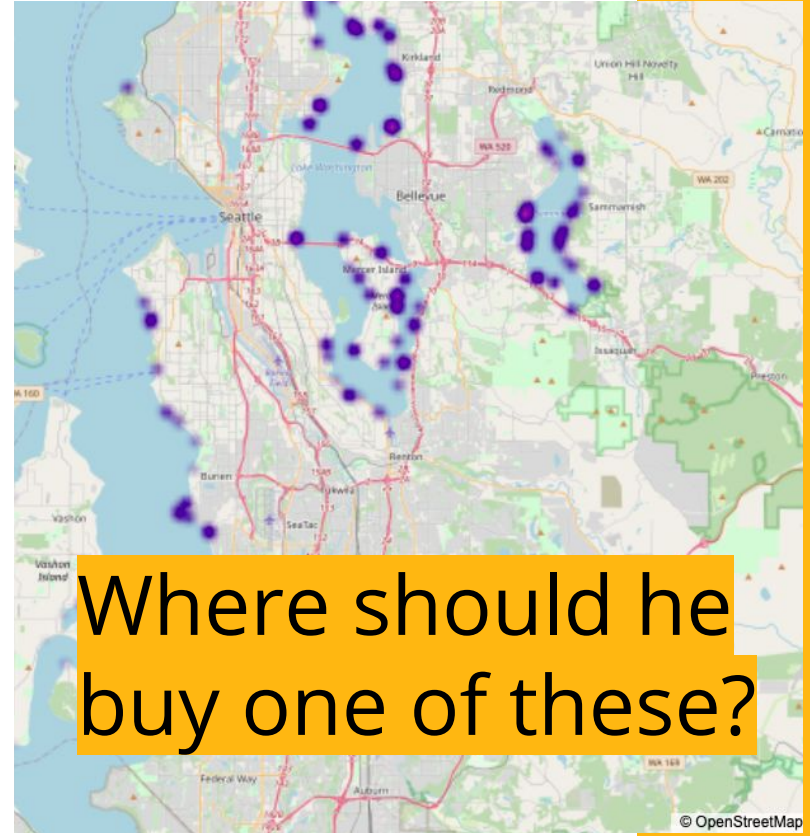

Old friend, I need a new place. This whole home office thing makes me crazy.

I want to live close to the water, what does that cost?

Let's sell my old place. It's run-down at the moment, should I renovate?

Make it cheap, but I want to move in ASAP. Get back to me soon. B.

Macklemore

## Ben's Place:

Bedrooms	3
bathrooms	3
sqft_living	4560
sqft_above	2760
sqft_lot15	13362
waterfront	0
grade	11

**Renovation\_status:** not renovated

→ USD 2,909,336.00

**Renovation\_status:** renovated

→ USD 3,129,036.00

**\$220,000.00**

more for a freshly  
renovated house.

# 146 houses ×

At waterfront have been sold last year.  
That's less than 1% of all sales in the region.

# Where to buy Waterfront ✕

**\$ 1,500,000.00**

costs the median house with waterfront. Prices range mostly between \$850K and \$2,300K.

**98070, 98166, 98040**

30% of all houses with waterfront are sold in these zipcode areas. With an median price of only \$1,500K.

**98070, 96023**

zipcode areas with rather cheap waterfront houses.

# Where to buy Waterfront ✕

**\$ 1,500,000.00**

costs the median house with waterfront. Prices range mostly between \$850K and \$2,300K.

**98070, 98166, 98040**

30% of all houses with waterfront are sold in these zipcode areas. With an median price of only \$1,500K.

**98070, 96023**

zipcode areas with rather cheap waterfront houses.

Ben! Good to hear from you. Renovate your place for no more than \$220K. Not worth it. Look for a new place with waterfront in 98070, 98166, and 98040. Will cost you about \$1.5M. Cheaper places in 98070, 96023.

Btw, this analysis is  $48h * \$95 \text{ USD/h} \approx \$5K$  - whenever it suits you. Good talking to you. Hope your family is doing fine.

## Feature Work

Low and high hanging features.

# Future Work ×

## Low hanging:

- How does the distance (as the crow flies) to a subway station correlates with the price?
- Do schools geo location influence the price?

## High hanging:

- time-to-center by public transportation, and car
- crime data per zipcode
- political data per zipcode

×

# End. Thanks.
